Module Description

Students who study this module will cover the topics of founding a legal entity, the associated tax requirements and strategies and options for external financing, and ultimately assessing which course of action is most appropriate for any given set of circumstances. Being a founder and entrepreneur is often seen as a paradise that is easily achieved. This module will debunk this myth and help students understand the real work, in clear steps, that get them through assessing the correct direction to take, and follow proven steps that have enabled CODE students to develop successful companies.

General Guidelines

In any assessment, three elements have to be demonstrated together:

- knowledge,

- application of knowledge,

- reflection on the application of knowledge.

Knowledge Areas

Students who successfully pass this module have acquired the following knowledge and are able to use it in practice:

- Know standard approaches to developing a startup: Lean Startup, Disciplined Entrepreneurship, and Y-Combinator.

- Know the options for legal structures and taxation impact

- Know popular options for capital and fundraising options, where necessary.

Learning Materials & Disclaimer

Learning units offered in relation to this module do not cover the full breadth of topics in this module. Students are expected to self-assess their knowledge and skills and augment their project experience and the input they take out of learning units with self-directed learning, e.g. utilizing the learning resources contained in the [digital classroom linked from the teaching space] (https://www.notion.so/codeuniversitywiki/Classroom-How-to-Start-a-Startup-2220f2153d6d80ef919ae501f1098ad2?source=copy_link).

Change of Assessment Format for Reassessments

For this module, changes of formats for reassessment ARE possible.
